Short Bio

Dan is a leading education adviser and author specialising in the ethical and practical use of Artificial Intelligence in schools and FE colleges. He advises governments and education systems internationally and writes weekly for Forbes on the future of learning and work.

Medium Bio

Dan Fitzpatrick is a leading voice in how education systems respond to Artificial Intelligence. Long before it became a global priority, he recognised its scale and urgency for schools and national systems and helped leaders move from uncertainty to confident, ethical action.

He has advised governments, parliamentary bodies, regulators, awarding organisations, and education charities, shaping national guidance in the UK, Dubai, and Kazakhstan while consistently prioritising public interest, learner safety, and long term capability. Alongside this policy work, Dan supports education leaders worldwide to embed sustainable Artificial Intelligence strategies across governance, curriculum, assessment, and workforce development.

Through bestselling books, weekly writing for Forbes, international keynote speaking, major media contributions including CNN, Sky News, BBC, and ITV, and initiatives such as the Edufuturists Awards and the Century Changemakers Student Awards, Dan ensures innovation reaches classrooms and communities as well as policy rooms.

Longer Bio

Dan Fitzpatrick is one of the most influential voices shaping how education systems respond to Artificial Intelligence. Long before it became a mainstream concern, Dan recognised both the scale and urgency of Artificial Intelligence for schools and national education systems, and has helped leaders move from uncertainty to informed and ethical action.

Dan has advised national governments, parliamentary bodies, regulators, awarding organisations, and education charities, consistently placing public interest, learner safety, and long term capability building ahead of short term technological enthusiasm. His work has informed national guidance in the UK, Dubai and Kazakhstan.

Alongside this policy leadership, Dan works directly with education leaders and institutions across the world to embed sustainable Artificial Intelligence strategies spanning governance, curriculum, assessment, workforce development, and ethical decision making. Through his popular bestselling books, weekly writing for Forbes, international keynote speaking, and the creation of initiatives such as the Edufuturists Awards and the Century Changemakers Student Awards, he has ensured that innovation reaches teachers, students, and communities, not just policy rooms. He is also a regular contributor on news outlets such as CNN, Sky News, BBC and ITV.

Dan's work continues to shape how education systems navigate one of the most significant technological shifts of our time with confidence, responsibility, and purpose.
